

DELIVERY CONSIDERATIONS

Deliveries to Site

Subject to geographical area and availability, our blocks can be delivered on the following vehicles:

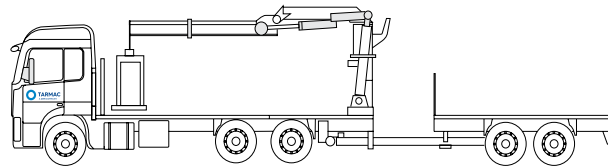

- ***Wagon and drag***
- ***Artic crane***
- ***Flatbed***
- ***Curtain sider***
- ***Extending trailer (EC)***

In order to facilitate a safe delivery please refer to our 'Point of Delivery Checklist'.

PLEASE CONSIDER THE FOLLOWING INFORMATION BEFORE SELECTING ANY OF THE PARTICULAR VEHICLES BELOW:

WAGON AND DRAG OR 'DRAWBAR'

We can detach the trailer, and tranship the product using a rigid vehicle - however there must be private land to leave the trailer on. The land must be flat and someone must stay with the trailer.

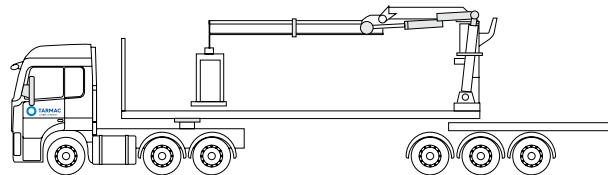

CURTAIN SIDER / FLATBED

Ensure you order either forklift packs or palletized packs. Also your customer will require a forklift on site to offload.

EXTENDING VEHICLE

We can service your order on an extending vehicle but remember our vehicles are STILL ARTICULATED even when closed.

Our delivery team
can be contacted on
0345 606 2468.

**REMEMBER: WE WON'T OFF LOAD ON SITE
IF THERE'S A SAFETY ISSUE SUCH AS.....**

MUDDY SITES

OVERHEAD CABLES

If you require delivery of blocks onto your own pallets they must be of sufficient quality to support the load. If the pallets are damaged, we may not be able to load onto them.

Tarmac drivers are not insured to lay pallets out - please speak to your site contact and ask them to get them ready and this will help to speed up our offload. If you can provide us with a site contact name and number we can advise an estimated time of arrival.

Working together helps to deliver safely and promptly.

PARKING

Parking across pavements or on double yellow lines

OFFLOADING

Offloading over walls or fencing.

AGGREGATE BLOCK STACKING

Unfortunately we are unable to stack blocks more than 2 packs high on building sites or 3 packs high for yard stockists.

To find out more about our range of BLOCKS and the best solution for your project call **0345 606 2468**
