PLEASE NOTE:

- Quantities for mini pack and system blocks are based on forklift off-load. Load capacity can be reduced by up to 40% if crane off-load is required.
- Load quantities can vary due to physical inconsistencies in vehicle type - for example, variation in bed length of trailer, centre-mount or row-loader crane.
- Delivered pack quantity may vary depending on vehicle type and configuration.
- There is a higher risk of quantity variation on those products with a 3.6N strength due to space availability on the vehicle rather than the weight capacity.

*Area of built wall includes mortar joints. ** Block weight based on 3% moisture content.
