

ULTISPORT MUGA

The ultimate sports surface

ULTISPORT MUGA

The ultimate sports surface

The smooth finish and consistent playing performance of ULTISPORT MUGA makes it the first choice for multi-use games areas. It also complies with the Sports and Play Contractors Association guidelines

ULTIMATE PERFORMANCE

Available as a 6mm surface course with the option of a 10mm or 14mm specialist binder course, ULTISPORT MUGA provides a smooth and consistent finish with a proven history of performance.

LASTING FINISH

Utilising specifically selected aggregates and a binder modifier, ULTISPORT MUGA provides a long lasting high performance surface. The modified binder also enhances workability during laying and improves the resistance of the finished surface to summer softening.

IMPROVED WATER CLEARANCE

A porous surface and binder course allows effective drainage, improving the playing surface and increasing court time for users. Designed to provide a durable surface that allows water to filter through and allow play to continue, or to restart quicker.

CHOICE OF COLOURS

Available in black and red as standard, there are also a range of other colours available as part of our ULTICOLOUR range, with a choice of aggregate to suit site requirements.

IMPROVED SAFETY

The modified binder locks in aggregate, improving surface integrity and reducing the risk of injury to players.

TECHNICAL DATA

The table below contains typical test results.

	Typical Design Voids	Typical Hydraulic Conductivity
Standard	BS EN 12697-8	DD229
Ultisport MUGA	16.0%	8000mm/hr (min 5000)
Ultisport Tennis	20.0%	15000mm/hr (min 5000)
Ultisport Binder Course 10mm	20.0%	15000mm/hr (min 5000)
Ultisport Binder Course 14mm	20.0%	15000mm/hr (min 5000)
