

TECHNICAL INFORMATION

EDGING AND JOINTING SPRAY

Product Data Sheet

DESCRIPTION

Edging and Jointing Spray is an emulsion-based bituminous aerosol, specially designed to complement the Tarmac bituminous materials product range for Repair and Reinstatement.

USES

- Easy to use and the simple spray-on process guarantees a clean finish to the job.
- Adheres to ironwork and concrete enabling the smallest repairs to be completed effectively.
- Used directly from the can, completely covers the whole area and its CFC-free propellant ensures the tightest corners are reached
- Can be used to seal guttering and shed roofs

SPECIAL PROPERTIES

- Can be used in all weathers
- Reduces water ingress into the repair
- Improves bonding between pothole and repair macadam
- Effective prevention of freeze/thaw damage
- Self levelling - no separate latex required
- Delivers long lasting results in an instant

PREPARATION

Before applying **Edging and Jointing Spray** remove all standing water and loose particles. The sealer can be applied to wet, damp or dry surfaces.

PLACING

Invert the can and press the spray button, cover the area to be sealed with long strokes from a distance of 175 to 250mm working from the top downwards. Ensure the entire surface is covered.

PACKAGING & STORAGE

Edging and Jointing Spray is available in 150 ml cans. It should be stored in a cool dry place out of the reach of children.

QUALITY CONTROL

All Tarmac products are factory blended, tested and packaged to quality control procedure in accordance with BS EN ISO 9001.

HEALTH AND SAFETY

Health and safety advice, which must be followed, can be found on the Material Safety Data Sheet. Skin contact with the product should be avoided. Avoid breathing in vapours or fumes. If the formation of vapours is a risk, then additional ventilation should be provided. Handle away from sources of ignition and heat
