

Technical information

Topflow Screed A-SP

DESCRIPTION

SP skin free technology has been designed to greatly reduce the need for initial sanding of Tarmac Topflow Screed A and its variants.

USES

SP has been formulated to give an open textured, skin free finish; which is ideal for floor finishes, and also does not impede drying efficiency.

Please refer to your local Tarmac representative for availability.

SP can be added to many of the products in the Tarmac Topflow screed range to give a skin free finish without affecting the characteristics of the mix.

PRODUCT FEATURES

- Self compacting
- Environmentally friendly
(Save up to 20Kge/CO₂ per m²)
- High fluidity for fast cost effective installation
- Guaranteed compaction & quality
- Minimum SR2 surface finish
- Large bay sizes reducing the need for joints (Maximum bay size 1000m²; UFH 300m²)
- No reinforcement with greatly reduced cracking and no curling
- No need for a curing membrane
